

PRESENTATION

Sontara® is manufactured according to exclusive DuPont de Nemours technology based on a process of hydraulic overlapping of fibres, containing no binder, chemical additive or adhesive.

Sontara® nonwovens offer the strength of fabric and the absorbant power of paper and are perfectly suited to a wide range of applications and professional environments.

Sontara® nonwovens can absorb 4 to 6 times their own weight in water. They can absorb oils and solvents easily and can also be used dry conserving all of their properties.
