

KITCHEN CLOTH

To prevent bacterial development, the food legislation requires important rules for the customers security.

This disposable rag replaces any textiles rags, which become a breeding ground for bacteria.

Moreover, Kitchen Cloth is very absorbent, heat resistant (i.e. removing hot thing from the oven). Kitchen Cloth can be use to dry your hands, or kitchen tools. Futhermore, it may act as a mop at the end-of-service.

> Characteristics ⁽¹⁾

Composition : 100% viscose	Technology : Spunlace	Physic resistance	MD	CD
Basis weight : 70 g/m ²	Colour : White	Tensile strenght	165N/5cm	37N/5cm
Thickness : 0,55 mm	Absorption : 690%	Elongation	27%	128%
	Absorption's time : < 1 sec			
	Origin : Made in France			

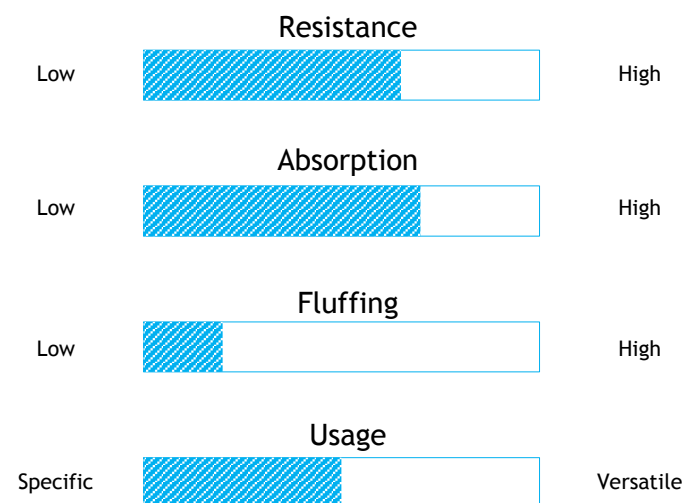

> Assets

- ✓ Heavy duty
- ✓ Hygienic
- ✓ Relief (scraping effect)
- ✓ Low tendency to fluff
- ✓ Highly absorbent
- ✓ Food contact
- ✓ Alveolous (recovery)
- ✓ Heat resistance (<230°)

> Use

- ✓ Food Industry
