

# C1 Wipe

## Hydroentangled polyester/cellulose wipe

### **Description**

The C1 Wipe is constructed using nonwoven fibers which are hydraulically entangled into fabric using a blend of 45% polyester and 55% cellulosic fibers. The C1 Wipe is an excellent all-purpose wipe for less critical, nonabrasive applications. It has an outstanding absorbency due to their cellulosic content. Strong, durable, and extremely absorbent, these wipes are excellent for wiping and absorbing spills. Features low levels of particles and extractables.
